

Weather Bingo Clues

You may want to adapt some of these definitions to meet your needs.

Air pressure	weight of the air pressing down on Earth
Cirrus	high feathery clouds that usually mean a change in weather is on the way
Meteorologist	a scientist that studies the weather
Evaporation	when water turns from a liquid to a gas
Hurricane	a giant swirling storm that brings rain and heavy winds
Cumulonimbus	a large cumulus cloud associated with thunderstorms
Humidity	an amount of moisture (water vapor) in the air
Wind	movement of air from one place to another
Condensation	process of water vapor (a gas) changing into a liquid through cooling
Warm front	when a warm air mass collides with a cooler air mass, often creating rain
Satellite	an object that orbits the Earth and assists in weather forecasting
Water cycle	the cycle of water between the ground, the oceans, and the atmosphere (the Earth System)
Thermometer	an instrument for measuring temperature
Air mass	large body of warm or cold air
Atmosphere	layers of air around the Earth
Anemometer	an instrument that measures wind speed
Cumulus	a puffy white cloud
Rain gauge	an instrument to record the amount of rainfall in a given area
Temperature	a measure of heat and cold
Stratus	thick, gray clouds that often bring rain
Cold front	when a cold air mass collides with a warm air mass often creating rain

Hygrometer	an instrument that measures the amount of humidity in the air
Frost	tiny ice crystals that form when water vapor freezes onto an object (ground, grass, window)
Dew	tiny water drops that form when water vapor condenses onto an object (ground, grass, etc.)
Lightning	a giant electric spark created during a thunderstorm
Snow	precipitation in the form of ice crystals
Climate	general weather patterns experienced in a place over a long period of time
Water vapor	water in the form of a gas
Barometer	an instrument that measures air pressure
Sleet	frozen rain
